## 1 Introduction

Superframes is an annotation scheme for semantic roles. Like other such schemes, it is essentially about pinning down, in a machine-readable form, “who did what to whom”. It is different from other such schemes, such as FrameNet (Baker et al., 1998), VerbNet (Kipper Schuler, 2005), PropBank (Palmer et al., 2005), VerbAtlas (Di Fabio et al., 2019), or WiSER (Feng et al., 2022) in a number of ways. It aims to avoid a number of practical problems in annotating with those schemes. Here’s how Superframes annotation works, in a nutshell:

1. Every content word (verb, noun, pronoun, adjective, or adverb) is a *predicate*. Every predicate evokes one of a few dozen *superframes*, which determines its coarse semantic class and the possible role labels for its arguments.
2. The syntactic *dependents* of a predicate can be *core arguments*, in which case they get one of the role labels defined by the superframe of the predicate, or *external arguments* or *modifiers*, in which case they are treated as evoking their own frame in which the predicate serves as a core argument.
3. There are only two main core role labels per superframe.

Superframe	Roles					Sec.
<b>SCENE</b>	<b>initial-scene</b>	<b>participant</b>	<b>scene</b>	<b>transitory-scene</b>	<b>target-scene</b>	2.1
<b>IDENTIFICATION</b>		<b>identified</b>	<b>identifier</b>			2.2
<b>ORDER</b>		<b>has-order</b>	<b>order</b>			2.3
<b>CLASS</b>	<b>initial-class</b>	<b>has-class</b>	<b>class</b>		<b>target-class</b>	2.4
<b>EXISTENCE</b>			<b>exists</b>			2.5
TRANSFORMATION-CREATION		original	material		created	2.6
REPRODUCTION					copy	2.7
<b>QUALITY</b>		<b>has-quality</b>	<b>quality</b>			2.8
<b>STATE</b>	<b>initial-state</b>	<b>has-state</b>	<b>state</b>		<b>target-state</b>	2.9
DESTRUCTION		destroyed				2.10
<b>EXPERIENCE</b>		<b>experiencer</b>	<b>experienced</b>			2.11
<b>ACTIVITY</b>		<b>is-active</b>	<b>activity</b>			2.12
<b>MARKER</b>		<b>has-marker</b>	<b>marker</b>			2.13
<b>ACCOMPANIMENT</b>		<b>accompanied</b>	<b>accompanier</b>			2.14
<b>ATTRIBUTE</b>		<b>has-attribute</b>	<b>attribute</b>			2.16
DEPictIVE		has-depictive	depictive			2.15
<b>ASSET</b>		<b>has-asset</b>	<b>asset</b>			2.17
<b>CAUSATION</b>		<b>result</b>	<b>causer</b>			2.18
RESULTATIVE		has-resultative	resultative			2.19
<b>COMPARISON</b>		<b>compared</b>	<b>reference</b>			2.20
CONCESSION		assertion	conceded			2.21
<b>EXPLANATION</b>		<b>explained</b>	<b>explanation</b>			2.22
<b>LOCATION</b>	<b>initial-location</b>	<b>has-location</b>	<b>location</b>	<b>transitory-location</b>	<b>target-location</b>	2.23
WRAPPING-WEARING		worn	wearer			2.24
ADORNMENT-TARNISHMENT	initial-surface	ornament	surface		target-surface	2.25
HITTING		hitting	hit			2.26
INGESTION		ingested		transitory-location	ingerter	2.27
EXCRETION	excreter	excreted		transitory-location		2.28
UNANCHORED-MOTION		has-location		transitory-location		2.29
<b>MEANS</b>		<b>has-means</b>	<b>means</b>			2.30
<b>MESSAGE</b>		<b>topic</b>	<b>content</b>			2.31
<b>PART-WHOLE</b>	<b>initial-whole</b>	<b>part</b>	<b>whole</b>		<b>target-whole</b>	2.32
<b>POSSESSION</b>	<b>initial-possessor</b>	<b>possessed</b>	<b>possessor</b>		<b>target-possessor</b>	2.33
<b>QUANTITY</b>		<b>has-quantity</b>	<b>quantity</b>			2.34
<b>SENDING</b>		<b>sent</b>	<b>sender</b>			2.35
<b>SEQUENCE</b>		<b>follows</b>	<b>followed</b>			2.36
<b>SOCIAL-RELATION</b>	<b>initial-social-relation</b>	<b>has-social-relation</b>	<b>social-relation</b>		<b>target-social-relation</b>	2.37
<b>TIME</b>		<b>has-time</b>	<b>time</b>			2.38
<b>NONCOMP</b>		<b>has-noncomp</b>	<b>noncomp</b>			2.39
<b>NONPARTICIPANT</b>		<b>has-nonparticipant</b>	<b>nonparticipant</b>			2.40

Table 1: The superframes and their roles. Top-level superframes are shown in bold. Underneath, some superframes have special cases with partly renamed roles, included to make them more intuitive to apply.

4. For predicates denoting change (or lack thereof) over time, some superframes have *aspectual variants* with role variants that allow to distinguish participants before, during, and after an event. This avoids having Source and Target as roles in their own right, which indicate the time sequence but suppress information about the nature of the relation that is changing.
5. Similarly, Superframes do not have the Agent role, which is often in conflict with roles indicating more specifically the agent's relation to other participants.
6. Doubt, ambiguity, and figurativity are systematically treated. If there is not one clear solution, the solution is to give two or more alternative labels.

Table 1 shows the superframes and their roles.

## 1.1 Core Arguments

The most prototypical predicate is a verb, and the simplest case is a verb with only one argument. It can for example denote an experience or an activity:

(1) Kim is sleeping<sup>EXPERIENCE</sup>

(2) Kim is partying<sup>ACTIVITY</sup>

With two core arguments, a verb denotes a relation that holds between them:

(3) Kim owns<sup>POSSESSION</sup> a house

(4) The house belongs<sup>POSSESSION</sup> to Kim

(5) Kim seems<sup>MESSAGE</sup> happy

## 1.2 Aspect and Mode

Rather than a static relationship between two entities, many verbs (and other predicates) denote a change (or absence of change) in such a relationship. We sort such predicates into a few coarse aspectual classes. For example, initiation (-INIT) means a state is begun or worked towards, deinitiation (-DEINIT) means a state is ended, completed, or its end is worked towards, change (-CHANGE) combines both, where one state is replaced by another, continuation (-CONT) means a state persists or is even intensified, and prevention (-PREV) means it fails to begin. Accordingly, roles with prefix target-, initial-, or transitory- mark participants at/beyond the end of, at the beginning of, or at some point during the event, respectively.

- (6) Kim got<sub>POSSESSION-INIT</sub> the house
- (7) Kim lost<sub>POSSESSION-DEINIT</sub> the house
- (8) Kim sold<sub>POSSESSION-CHANGE</sub> the house to Sandy
- (9) Kim kept<sub>POSSESSION-CONT</sub> the house
- (10) Kim went<sub>LOCATION-CHANGE</sub> from Chicago via Pittsburgh to Boston
- (11) The vase fell<sub>LOCATION-CHANGE</sub> to the ground
- (12) The vase broke<sub>STATE-CHANGE</sub>
- (13) Kim befriended<sub>SOCIAL-RELATION-INIT</sub> Sandy
- (14) Kim married<sub>SOCIAL-RELATION-INIT</sub> Sandy
- (15) Kim divorced<sub>SOCIAL-RELATION-DEINIT</sub> Sandy

The SCENE superframe is often evoked by “light” verbs that contribute an aspectual or modal meaning. Thus, its aspectual variants are especially common.

- (16) The concert began<sub>SCENE-INIT</sub>
- (17) The concert continued<sub>SCENE-CONT</sub>
- (18) The concert finished<sub>SCENE-DEINIT</sub>
- (19) The shouting intensified<sub>SCENE-CONT</sub>

- (20) The shouting faded<sub>SCENE-DEINIT</sub>
- (21) A coup was attempted<sub>SCENE-INIT</sub>
- (22) Kim finished<sub>SCENE-DEINIT</sub> their work
- (23) Swift action prevented<sub>SCENE-PREV</sub> an outbreak
- (24) Kim refrained<sub>SCENE-PREVENTION</sub> from going
- (25) Kim prevented<sub>SCENE-PREV</sub> Sandy from going
- (26) Kim saved<sub>SCENE-PREV</sub> Sandy from the dragon

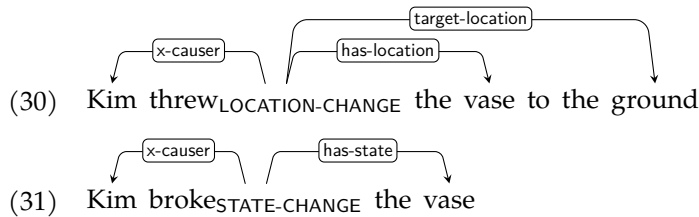

In the last example, *dragon* is to be understood metonymically as a scene in which Sandy would have been harmed by the dragon.

In addition, we use the modal suffixes -NECESSITY and -POSSIBILITY. They can combine with aspectual suffixes.

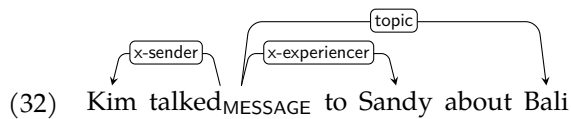

- (27) Change is necessary<sub>SCENE-NECESSITY</sub>
- (28) Change is possible<sub>SCENE-POSSIBILITY</sub>
- (29) Kim owes<sub>POSSESSION-CHANGE-NECESSITY</sub> Sandy money

### 1.3 Non-core Arguments

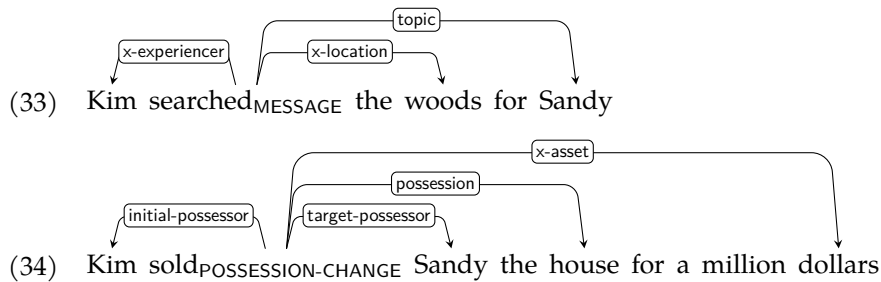

Core arguments always get role labels from the superframe the predicate evokes. But many verbs have more arguments. One common case is a subject that is presented as the causer of the scene. For example, compare (30) with (11). The core scene is the same (same superframe, same arguments). We now assume there is an additional CAUSATION scene with *Kim* as the causer and the core scene as the result. We denote this by giving *Kim* the causer role label, with an x- prefix to mark it as a non-core role.

Two other common non-core arguments are the senders and recipients (experiencers) of messages.

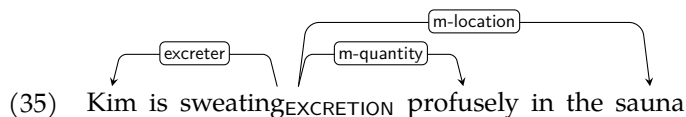

Other non-core arguments are usually rather predicate-specific.

## 1.4 Modifiers

Like non-core arguments, modifiers are assumed to evoke an additional frame, and labeled with the role they fill in that frame, but with a prefix marking them as modifiers: m-.

## 1.5 Nonverbal Predicates

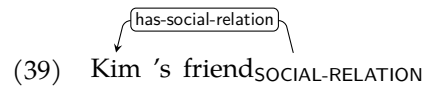

So far, we have only looked at verbal predicates. But of course, there are other types of predicates. An ordinary noun like *tree* evokes the CLASS frame, marking the entity it refers to as being a member of a class (in this case: the class of trees). There are no arguments here because the predicate itself doubles as a referent. However, the predicate can of course be modified:

Event nouns evoke event frames and have arguments:

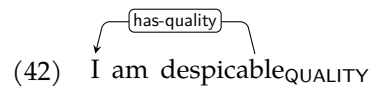

Relational nouns evoke relational frames and have arguments:

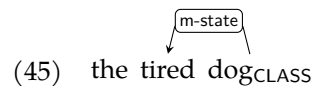

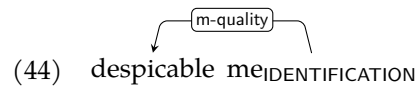

Pronouns and names evoke the IDENTIFICATION frame, meaning that they identify their referent as some entity (via naming or anaphora resolution).

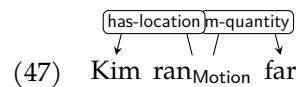

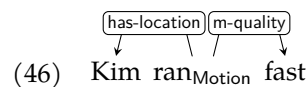

Predicate adjectives most typically denote states or qualities.

With attributive adjectives, the dependency relation is reversed, and the role label is changed accordingly.

Similarly for adverbs denoting, e.g, manner (quality) or extent (quantity):

## 1.6 Control Relations

spell out strategies for consistent detection (xcomp, MESSAGE/SCENE frames, special cases...)

Many constructions systematically introduce semantic predicate-dependent dependencies that do not correspond to (surface) syntactic dependencies. In

such cases, we add those dependency links.

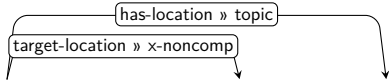

- (48) Kim promised Sandy to come<sub>LOCATION-CHANGE</sub> (subject control)
- (49) Kim persuaded Sandy to come<sub>LOCATION-CHANGE</sub> (object control)
- (50) Kim seemed to fly<sub>Motion</sub> (raising)
- (51) Kim entered the room singing<sub>MESSAGE</sub> (depictive)
- (52) You're talking me silly<sub>STATE</sub> (resultative)
- (53) Kim has come to stay<sub>LOCATION-CONTINUATION</sub> (subjectless adverbial clause)
- (54) Kim left after trashing<sub>STATE-CHANGE</sub> the room (subjectless adverbial clause)
- (55) Kim is hard to love<sub>MESSAGE</sub> (*tough* construction)
- (56) the song I like<sub>MESSAGE</sub> (relative clause)
- (57) the question we raised without answering<sub>MESSAGE</sub> (parasitic gap)

## 1.7 Figurativity and Idiomaticity

Difficulties in choosing frames often arise because a predicate literally evokes one frame, but is used in a way that perhaps fits another frame equally well or better. In such cases, annotate both the more literal frame and roles, followed by the >> operator, followed by the more figurative frame and roles.

- (58) A hush passed<sub>LOCATION-CHANGE » SCENE</sub> over the group
- (59) Kim refused<sub>MESSAGE » SCENE</sub> to eat

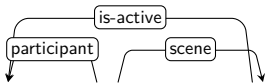

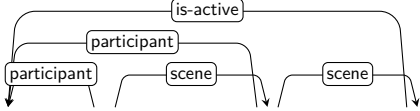

This mechanism can be used to indicate that a modification may not be fully compositional:

- (60)  primeval forest<sub>CLASS</sub>
- (61)  colored pencil<sub>CLASS</sub>
- (62)  to lay<sub>LOCATION-CHANGE » MESSAGE-DEINIT</sub> aside my drawings

## 2 Superframes Reference

### 2.1 SCENE

A “meta” frame for predicates where the main frame is invoked by scene, and the predicate adds some temporal, aspectual, modal, etc., meaning, or just acts as a light verb. participant is assigned a role by scene. In the following examples, we show the annotations for both the matrix predicate and the embedded predicate in one graph.

- (63)  Kim plays<sub>SCENE</sub> tennis<sub>ACTIVITY</sub>
- (64)  Kim used<sub>SCENE</sub> to play<sub>SCENE</sub> tennis<sub>ACTIVITY</sub>

More examples can be found in Section 1.2.

### 2.2 IDENTIFICATION

identifier identifies identified.

Evoked by pronouns, names, and other identifiers, as well as predicates denoting naming relationships.

- (65) I<sub>IDENTIFICATION</sub> saw a picture
- (66) I can distinguish China<sub>IDENTIFICATION</sub> from Arizona
- (67)  a book called<sub>IDENTIFICATION</sub> True Stories from Nature

(68) This is Kim<sub>IDENTIFICATION</sub>

Predicates that evoke other frames can still use x-identified to mark the copula subject as identified:

(69) This is the book<sub>MESSAGE</sub> I like

## 2.3 ORDER

order indicates the order that has-order has in some sequence.

(70) Chapter<sub>MESSAGE</sub> 1

(71) my first drawing<sub>MESSAGE</sub>

## 2.4 CLASS

class indicates the class of entity that has-class represents.

Most prototypically evoked by common nouns with no arguments.

(72) swallowing an animal<sub>CLASS</sub>

## 2.5 EXISTENCE

exists exists. Use this only for non-scene entities; for scenes, use the SCENE frame.

(73) I exist<sub>EXISTENCE</sub>

(74) There is<sub>EXISTENCE</sub> a hill

(75) There is<sub>SCENE</sub> a hubbub

## 2.6 TRANSFORMATION-CREATION

Special case of EXISTENCE-INIT where rcreated (aka target-exists) is newly created from material, or material is transformed to become created.

(76) I succeeded in making<sub>Transformation-Creation</sub> my first drawing

## 2.7 REPRODUCTION

Special case of EXISTENCE-INIT where original continues to exist, and a (modified) copy (aka target-exists) comes into existence.

## 2.8 QUALITY

quality indicates a (permanent) quality/property/manner of has-quality.

## 2.9 STATE

state indicates a (temporary) state of has-state.

- (87) the six months that they need for digestion<sub>STATE-CHANGE</sub>
- (88) And that hasn't much improved<sub>STATE-CHANGE</sub> my opinion of them

## 2.10 DESTRUCTION

Special case of STATE-CHANGE where destroyed (aka has-state) goes out of existence.

- (89) Sam 's death<sub>Destruction</sub>
- (90) Sam 's destruction<sub>Destruction</sub> of the city

## 2.11 EXPERIENCE

experienced indicates an experience that experiencer undergoes.

Used for dynamic scenes where the experiencer is not necessarily active, and that cannot well be framed as a state change. Also used for sensory and mental perception, addressees in communication, beneficiaries, and for "bystander" roles.

- (91) Kim 's adventures<sub>EXPERIENCE</sub> in the jungle
- (92) Kim attacked<sub>EXPERIENCE</sub> Sandy
- (93) I saw<sub>MESSAGE</sub> a magnificent picture
- (94) I pondered<sub>MESSAGE</sub> deeply
- (95) Kim talked<sub>MESSAGE</sub> to Sandy
- (96) Kim did<sub>SCENE</sub> something nice for Sandy
- (97) Kim cooked a meal only to have<sub>SCENE</sub> Sandy spurn it

## 2.12 ACTIVITY

is-active actively participates in activity.

Used for dynamic scenes where is-active has agency and that cannot well be framed as a state change.

- (98) Kim worked<sub>ACTIVITY</sub>
- (99) Kim partied<sub>ACTIVITY</sub>
- (100) Kim had sex<sub>ACTIVITY</sub>
- (101) after some work<sub>ACTIVITY</sub> with a colored pencil
- (102) I devoted myself to geography<sub>ACTIVITY</sub>

## 2.13 MARKER

marker marks has-marker for modal strength, aspect, discourse function, etc.

Umbrella frame for various kinds of predicates that denote properties of propositions rather than scenes, often realized as “sentence adverbs”.

- (103) Fortunately Kim probably even knows<sub>MESSAGE</sub> that

## 2.14 ACCOMPANIMENT

accompanier accompanies accompanied, meaning that it occurs together with it or participates equally in the same scene.

- (104) veggies<sub>CLASS</sub> with rice
- (105) The veggies come<sub>ACCOMPANIMENT</sub> with rice
- (106) Kim added<sub>ACCOMPANIMENT-INIT</sub> rice to the veggies

Often, the accompanier denotes not the accompanying scene but an entity participating in it, and must be metonymically understood as the scene.

## 2.15 DEPICTIVE

Special case of ACCOMPANIMENT where depictive (aka accompanier) assigns a participant of has-depictive (aka accompanied) a role (cf. Sec. 1.6).

## 2.16 ATTRIBUTE

In a scene has-attribute, attribute is the part or attribute of one or more participants that is most directly involved in the scene.

Control relations?

## 2.17 ASSET

In a scene has-asset, asset is given or offered in an exchange or wager.

## 2.18 CAUSATION

causer causes result.

- (125) The war caused<sub>CAUSATION</sub> a famine
- (126) There was<sub>SCENE</sub> a famine because of the war
- (127) Der Wasserdruck stieg<sub>QUANTITY-CHANGE</sub> , wodurch der Brunnen überfloss
- (128) Die Qualität ist der Motivation geschuldet<sub>CAUSATION</sub>
- (129) Kim went<sub>LOCATION-CHANGE</sub> to town because they wanted to buy food

Note how the last example expresses a purpose, but expresses it as a cause, so m-causer is the right label to use. Compare this to construal as a purpose:

- (130) Kim went<sub>LOCATION-CHANGE</sub> to town to buy food

## 2.19 RESULTATIVE

Special case of CAUSATION where resultative (aka result) assigns an argument of has-resultative (aka causer) a role. We treat the English resultative construction as a valency-changing operation that adds one or two arguments to the matrix predicate, so we use x-resultative rather than m-resultative.

- (131) Kim hammered<sub>HITTING</sub> the metal flat<sub>STATE</sub>
- (132) Kim sneezed<sub>EXPERIENCE</sub> the napkin off the table<sub>CLASS</sub>
- (133) Kim painted<sub>ADORNMENT-TARNISHMENT</sub> the room red<sub>QUALITY</sub>

explain x-has-location

## 2.20 COMPARISON

compared is characterized with respect to reference.

Examples of comparing scenes:

Examples of comparing non-scene entities:

## 2.21 CONCESSION

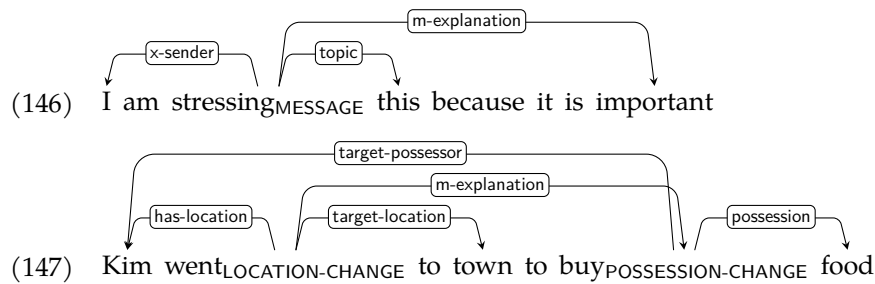

Special case of COMPARISON, where compared is what's asserted and reference is what's conceded.

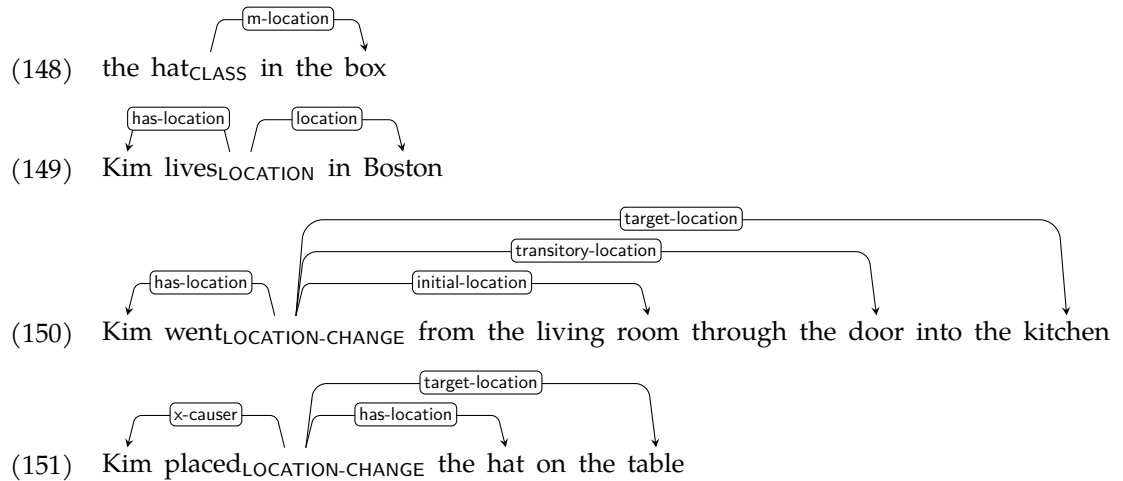

## 2.22 EXPLANATION

explanation explains explained, but is not a cause, but, e.g., a purpose.

## 2.23 LOCATION

Describes has-location as located or moving wrt. respect to location.

## 2.24 WRAPPING-WEARING

Special case of LOCATION where wearer (aka location) wears or is wrapped in wrapper (aka has-location).

- (153) Kim is wearing<sub>WRAPPING-WEARING</sub> glasses
- (154) The shroud wraps<sub>WRAPPING-WEARING</sub> the scepter
- (155) Kim put<sub>WRAPPING-WEARING-INTI</sub> on a sweater
- (156) Kim took<sub>WRAPPING-WEARING-DEINIT</sub> off their glasses

## 2.25 ADORNMENT-TARNISHMENT

Special case of LOCATION where ornament (aka has-location sits on surface (aka location)).

- Kim decorated<sub>ADORNMENT-TARNISHMENT</sub> the balcony with fairy lights
- Kim splashed<sub>ADORNMENT-TARNISHMENT-INIT</sub> Sandy with water
- Kim washed<sub>ADORNMENT-TARNISHMENT-DEINIT</sub> the dirt off Sandy
- Kim washed<sub>ADORNMENT-TARNISHMENT-DEINIT</sub> Sandy

## 2.26 HITTING

Special case of LOCATION-INIT where hitting (aka has-location) comes into contact with hit (aka target-location).

- (157) Kim hit<sub>HITTING</sub> Sandy
- (158) Kim hit<sub>HITTING</sub> Sandy with a stick
- (159) The stick hit<sub>HITTING</sub> Sandy

## 2.27 INGESTION

Special case of LOCATION-INIT where ingester (aka target-location) ingests ingested (aka has-location).

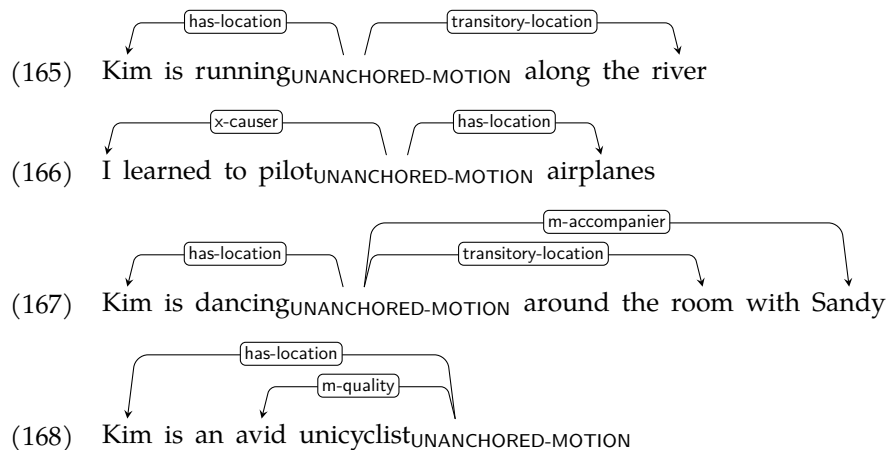

## 2.28 EXCRETION

Special case of LOCATION-DEINIT where excreter (aka initial-location) excretes excreted (aka has-location).

## 2.29 UNANCHORED-MOTION

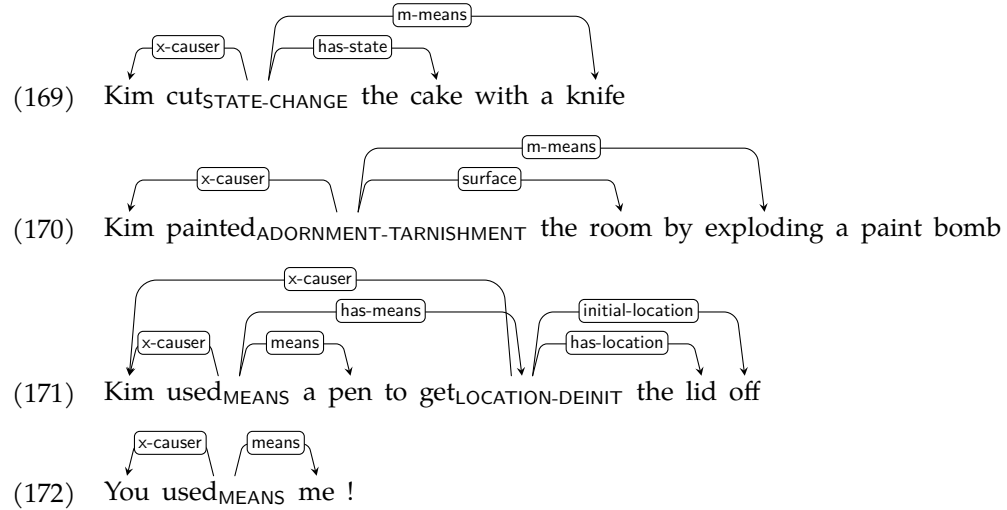

Special case of LOCATION-CHANGE where no initial or target location is indicated.

define clearly when dancing etc. is UNANCHORED-MOTION and when it is ACTIVITY

## 2.30 MEANS

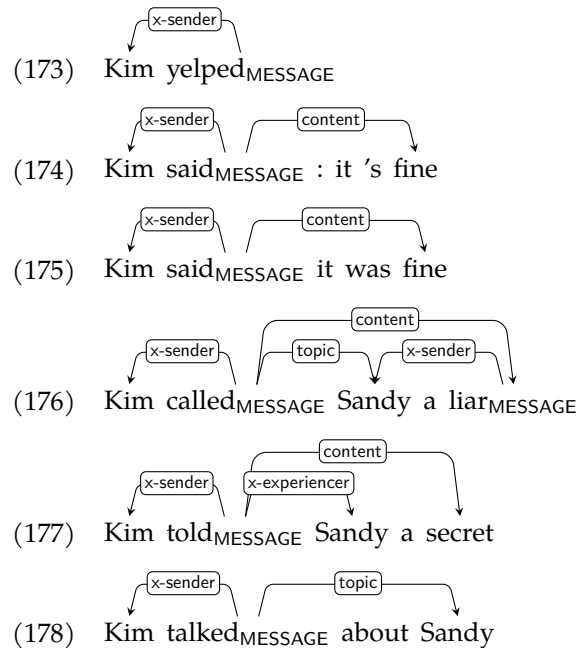

has-means is a scene caused by something via an intermediary means.

## 2.31 MESSAGE

A message about topic with content content is expressed or received or just exists in recorded form. When content and topic are both realized, content must assign a role to topic.

### 2.31.1 Expression

(179) Kim talked<sub>MESSAGE</sub> shit<sub>MESSAGE</sub> about Sandy

(180) Kim and Sandy conversed<sub>MESSAGE</sub>

(181) Kim conversed<sub>MESSAGE</sub> with Sandy

### 2.31.2 Gesture

(182) Kim curtsayed<sub>MESSAGE</sub> to the Queen

(183) Kim shook<sub>UNANCHORED-MOTION » MESSAGE</sub> their head no

### 2.31.3 Performance

Performance of a work of art is framed as MESSAGE where the work of art is the topic.

(184) Kim played<sub>MESSAGE</sub> a little tune on their tuba

(185) They performed<sub>MESSAGE</sub> the play

(186) Kim sang<sub>MESSAGE</sub> a song

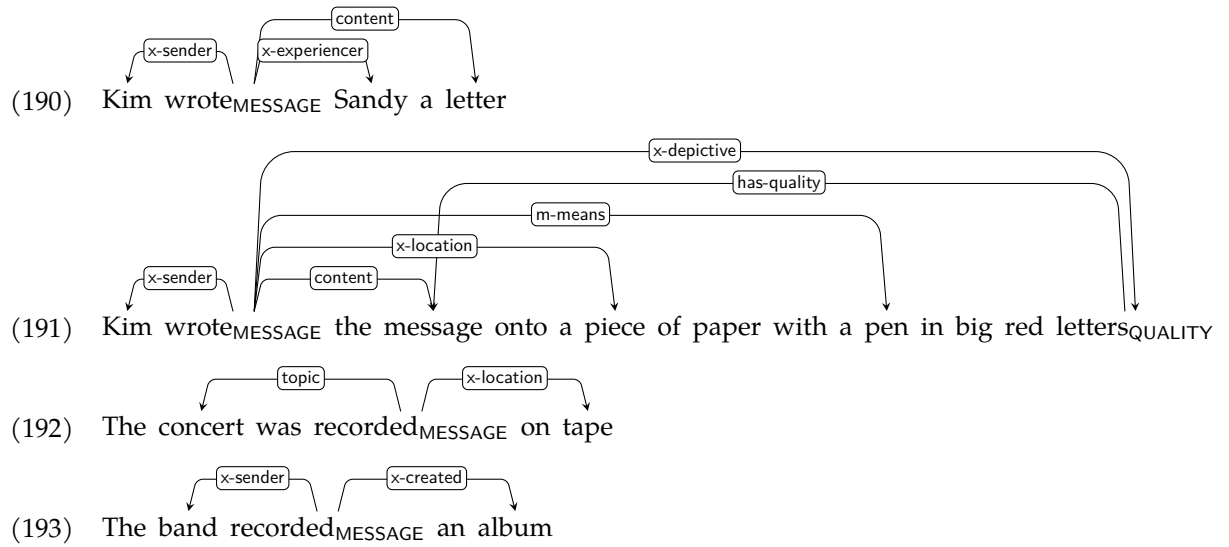

### 2.31.4 Depiction

(187) Kim drew<sub>MESSAGE</sub> a heron

(188) a picture<sub>MESSAGE</sub> of the heron

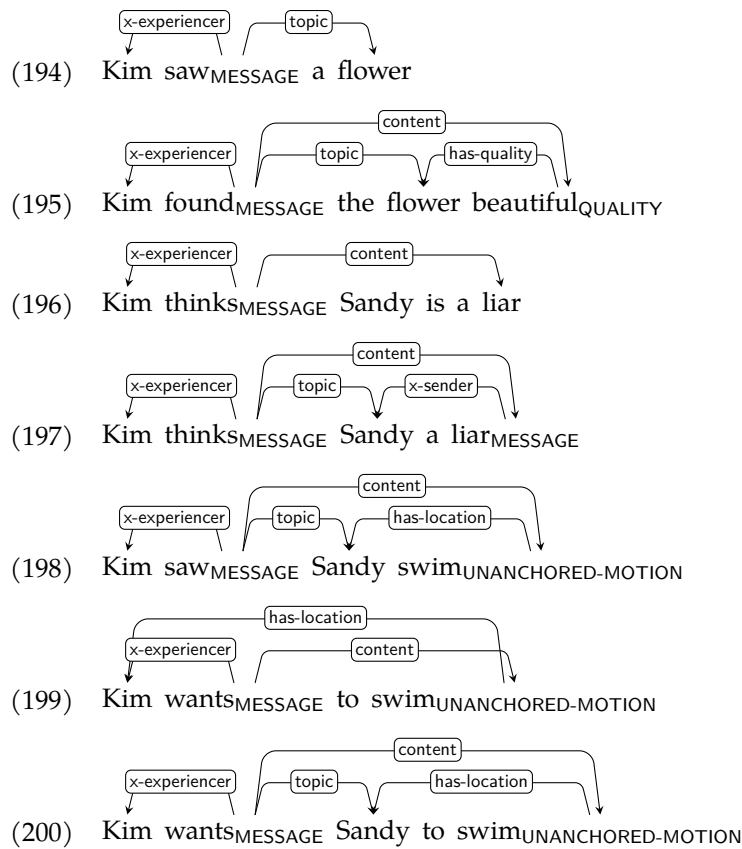

### 2.31.5 Recording

(189) Kim drew<sub>MESSAGE</sub> a picture

### 2.31.6 Perception

We also frame perception as MESSAGE, including mental and volitional perception.

- (201) Kim seems<sub>MESSAGE</sub> happy<sub>MESSAGE</sub>
- (202) Kim seems<sub>MESSAGE</sub> happy<sub>MESSAGE</sub> to Sandy
- (203) The Thought Police observed<sub>MESSAGE</sub> Winston
- (204) Kim studies<sub>MESSAGE</sub> linguistics
- (205) Sandy is a professor<sub>MESSAGE</sub> of linguistics
- (206) The jury found<sub>MESSAGE</sub> Kim guilty<sub>SCENE</sub> of the crime<sub>ACTIVITY</sub>

Use MESSAGE-INIT (MESSAGE-DEINIT, MESSAGE-PREV) for the coming about (ending, failing to come about) of knowledge and awareness.

- (207) Kim noticed<sub>MESSAGE-INIT</sub> the bird
- (208) Kim taught<sub>MESSAGE-INIT</sub> Sandy Spanish
- (209) Kim measured<sub>MESSAGE-INIT</sub> the elasticity
- (210) Kim forgot<sub>MESSAGE-DEINIT</sub> everything they knew
- (211) Kim forgot<sub>MESSAGE</sub> about the cake
- (212) Kim forgot<sub>MESSAGE-PREV</sub> to take the trash out

## 2.32 PART-WHOLE

part is part of whole.

- (213) Kim 's leg<sub>CLASS</sub>
- (214) a man<sub>CLASS</sub> with a mustache
- (215) part<sub>PART-WHOLE</sub> of the year
- (216) wheat contains<sub>PART-WHOLE</sub> gluten

### 2.33 POSSESSION

possessor possesses or controls the possessed.

- (217) Kim 's house<sub>CLASS</sub>
- (218) Kim owns<sub>POSSESSION</sub> a house
- (219) The house belongs<sub>POSSESSION</sub> to Kim
- (220) the owner<sub>POSSESSION</sub> of the house
- (221) Kim has<sub>POSSESSION</sub> Sandy 's phone
- (222) Kim bought<sub>POSSESSION-CHANGE</sub> a house from Sandy
- (223) Sandy sold<sub>POSSESSION-CHANGE</sub> Kim the house
- (224) Kim kept<sub>POSSESSION-CONT</sub> the house
- (225) Kim lost<sub>POSSESSION-DEINIT</sub> the house
- (226) Caesar conquered<sub>POSSESSION-INIT</sub> Gaul

- (227) Caesar 's conquest<sub>POSSESSION-INIT</sub> of Gaul
- (228) Kim owes<sub>POSSESSION-CHANGE-NECESSITY</sub> Sandy money

### 2.34 QUANTITY

quantity is the quantity, degree, or extent of has-quantity.

- (229) three burgers<sub>CLASS</sub>
- (230) three liters<sub>QUANTITY</sub> of coke
- (231) We discourage<sub>MESSAGE</sub> this emphatically

### 2.35 SENDING

### 2.36 SEQUENCE

follows follows followed, e.g., temporally, logically, by rank, as heir, etc.

- (232) I will join<sub>SOCIAL-RELATION-INIT</sub> the club if they ask me
- (233) Form follows<sub>SEQUENCE</sub> function
- (234) Cook is Jobs 's successor<sub>SEQUENCE</sub>
- (235) Das fußt<sub>SEQUENCE</sub> auf einer falschen Vorstellung
- (236) The start date is contingent<sub>SEQUENCE</sub> on their approval
- (237) Eine Aussöhung bedingt<sub>SEQUENCE</sub> eine Entschuldigung

## 2.37 SOCIAL-RELATION

has-social-relation is an individual that is in some socially constructed relationship with social-relation. social-relation might, e.g., be a relative, a friend, an organization, a responsibility, or a judicial sentence.

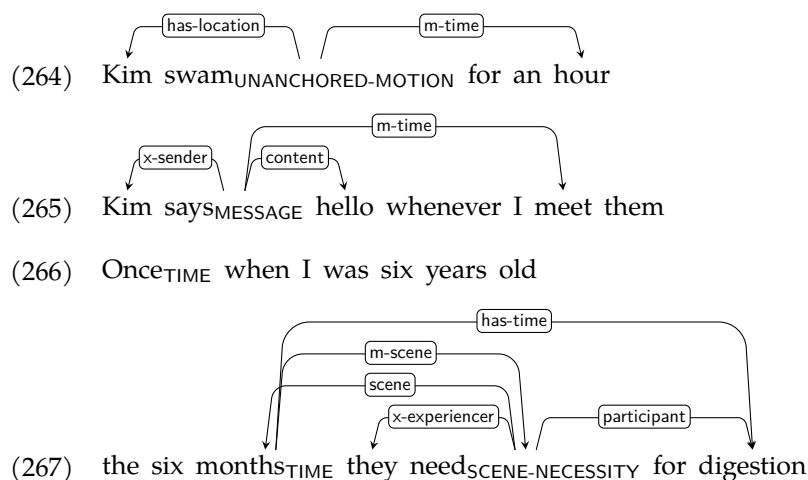

- (251) The official married<sub>SOCIAL-RELATION-INIT</sub> Kim and Sandy
- (252) Kim divorced<sub>SOCIAL-RELATION-INIT</sub> Sandy
- (253) Kim befriended<sub>SOCIAL-RELATION</sub> Sandy
- (254) Kim took<sub>SOCIAL-RELATION-INIT</sub> the job
- (255) Kim joined<sub>SOCIAL-RELATION-INIT</sub> Google
- (256) Kim joined<sub>SOCIAL-RELATION-INIT</sub> a union
- (257) Sandy fired<sub>SOCIAL-RELATION-DEINIT</sub> Kim from their job
- (258) Kim left<sub>SOCIAL-RELATION-DEINIT</sub> Google
- (259) Kim assumed<sub>SOCIAL-RELATION-INIT</sub> office
- (260) The judge sentenced<sub>SOCIAL-RELATION-INIT</sub> Kim to three days in prison
- (261) Kim was pardoned<sub>SOCIAL-RELATION-DEINIT</sub>

### 2.38 TIME

time indicates when, how often, or for how long has-time takes place. Also evoked by time expressions without arguments.

- (262) Kim swims<sub>UNANCHORED-MOTION</sub> on Monday
- (263) Kim sneezed<sub>EXPERIENCE</sub> twice

## 2.39 NONCOMP

TBD

## 2.40 NONPARTICIPANT

move resultatives here

TBD

# 3 Memos

## 3.1 Prefer Core over Non-core Arguments

When an argument fills both a core and a non-core role, it is more important to annotate the former.

## 3.2 Arguments Determine Frames

The most important criterion in choosing a frame for a predicate is that there should be suitable roles for the predicate's arguments, even if they are unrealized in the annotated instance. For example, while *drawing* denotes a CLASS of things, it can occur with a prepositional argument denoting a topic, so MESSAGE is a better choice.

### 3.3 Participant Nouns

Some nouns denote a person who participates in a specific type of scene in a specific type of role. In such cases, use the most appropriate frame for that scene. For example, in a narrative where the narrator has just been criticized by a stranger, you could annotate as follows:

In other cases, such nouns rather denote a person's profession or expertise or their role in a social context:

### 3.4 Particle Verbs

In UD, particle verbs are connected to their particle via the `compound:prt` relation. If the meaning is spatial, this dependency is labeled with `initial-location` or `target-location`.

In semi-non-compositional particle verbs, where the particle adds a partially predictable but nonspatial meaning to the verb, use an appropriate role, e.g., `x-marker` if the meaning is aspectual.

In fully non-decompositional particle verbs, where the meaning is not predictable, use `x-noncomp`.
