## 1 Introduction

Superframes is an annotation scheme for semantic roles. Like other such schemes, it is essentially about pinning down, in a machine-readable form, "who did what to whom". It is different from other such schemes, such as FrameNet (Baker et al., 1998), VerbNet (Kipper Schuler, 2005), PropBank (Palmer et al., 2005), VerbAtlas (Di Fabio et al., 2019), or WiSER (Feng et al., 2022) in a number of ways. It aims to avoid a number of practical problems in annotating with those schemes. Here's how Superframes annotation works, in a nutshell:

- 1. Every content word (verb, noun, pronoun, adjective, or adverb) is a *predicate*. Every predicate evokes one of a few dozen *superframes*, which determines its coarse semantic class and the possible role labels for its core arguments.
- 2. The syntactic *dependents* of a predicate can be *core arguments*, in which case they get one of the role labels defined by the superframe of the predicate,

Superframe	Roles					Sec.
SCENE	initial-scene	participant	scene	transitory-scene	target-scene	2.1
IDENTIFICATION		identified	identifier			2.2
RANK		has-rank	rank			2.3
CLASS	initial-class	has-class	class		target-class	2.4
EXISTENCE			exists		-	2.5
TRANSFORMATION-CREATION		material			created	2.6
REPRODUCTION		original			copy	2.7
QUALITY		has-quality	quality		.,	2.8
STATE	initial-state	has-state	state		target-state	2.9
DESTRUCTION		destroved			o .	2.10
EXPERIENCE		experiencer	experienced			2.11
ACTIVITY		is-active	activity			2.12
MODE		has-mode	mode			2.13
ACCOMPANIMENT		accompanied	accompanier			2.14
DEPICTIVE		has-depictive	depictive			2.15
ATTRIBUTE		has-attribute	attribute			2.16

TIME		has-time	time			2.41
NONCOMP		has-noncomp	noncomp			2.42

Table 1: The superframes and their roles. Top-level superframes are shown in bold. Underneath, some superframes have special cases with partly renamed roles, included to make them more intuitive to apply.

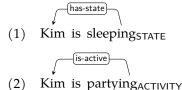

or *external arguments* or *modifiers*, in which case they are treated as evoking their own frame in which the predicate serves as a core argument.

- 3. There are only two main core role labels per superframe.
- 4. For predicates denoting change (or lack thereof) over time, some superframes have *aspectual variants* with role variants that allow to distinguish participants before, during, and after an event. This avoids having Source and Target as roles in their own right, which indicate the time sequence but suppress information about the nature of the relation that is changing.
- Similarly, Superframes do not have the Agent role, which is often in conflict with roles indicating more specifically the agent's relation to other participants.
- 6. Doubt, ambiguity, and figurativity are systematically treated. If there is not one clear solution, the solution is to give two or more alternative labels.

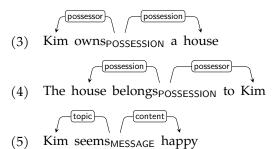

Table 1 shows the superframes and their roles.

### 1.1 Core Arguments

The most prototypical predicate is a verb, and the simplest case is a verb with only one argument. It can for example denote a state or an activity:

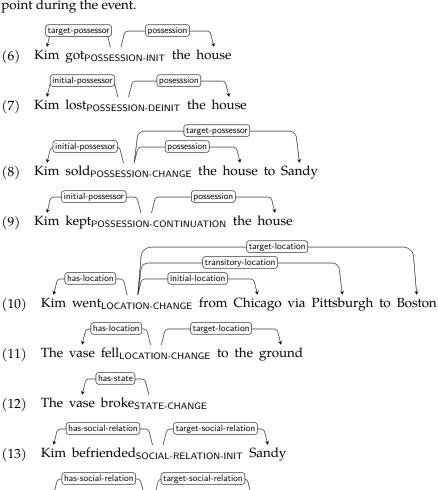

With two core arguments, a verb denotes a relation that holds between them:

## 1.2 Aspect and Mode

Rather than a static relationship between two entities, many verbs (and other predicates) denote a change (or absence of change) in such a relationship. We sort such predicates into a few coarse aspectual classes. For example, initiation (-INIT) means a state is begun or worked towards, deinitiation (-DEINIT) means a state is ended, completed, or its end is worked towards, change (-CHANGE) combines both, where one state is replaced by another, and continuation (-CONTINUATION)

means a state persists or is even intensified. Accordingly, roles with prefix target- mark participants at or beyond the end of the event, initial- marks participants at the beginning of the event, and transitory- marks participants at some point during the event.

The SCENE superframe is often evoked by "light" verbs that contribute an aspectual or modal meaning. Thus, its aspectual variants are especially common.

(16) The concert beganscene-INIT

(initial-scene)

(17) The concert continued<sub>SCENE-CONTINUATION</sub>

(14) Kim married<sub>SOCIAL-RELATION-INIT</sub> Sandy

Kim divorced<sub>SOCIAL-RELATION-DEINIT</sub> Sandy

(18) The concert finished<sub>SCENE-DEINIT</sub>

(19) The shouting intensified<sub>SCENE-CONTINUATION</sub>

(20) The shouting faded<sub>SCENE-DEINIT</sub>

(21) A coup was attempted<sub>SCENE-INIT</sub>

(22) Kim finished<sub>SCENE-DEINIT</sub> their work

In addition, we use the modal suffixes -NECESSITY, -POSSIBILITY. and -NEG. They can combine with aspectual suffixes.

- scene
- (23) Change is necessary<sub>SCENE-NECESSITY</sub>

(24) Change is possible<sub>SCENE-POSSIBILITY</sub>

(25) Kim owespossession-change-necessity Sandy money

(26) Swift action prevented<sub>SCENE-INIT-NEG</sub> an outbreak

(27) Kim refrained<sub>SCENE-INIT-NEG</sub> from going

(28) Kim prevented<sub>SCENE-INIT-NEG</sub> Sandy from going

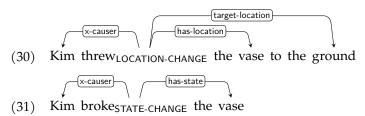

(29) Kim saved<sub>SCENE-INIT-NEG</sub> Sandy from the dragon

In the last example, *dragon* is to be understood metonymically as a scene in which Sandy would have been harmed by the dragon.

### 1.3 Non-core Arguments

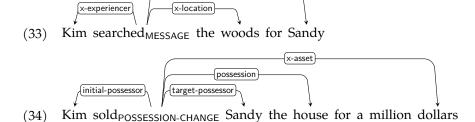

Core arguments always get role labels from the superframe the predicate evokes. But many verbs have more arguments. One common case is a subject that is presented as the causer of the scene. For example, compare (30) with (11). The core scene is the same (same superframe, same arguments). We now assume there is an additional CAUSATION scene with *Kim* as the causer and the core scene as the result. We denote this by giving *Kim* the causer role label, with an x- prefix to mark it as a non-core role.

Two other common non-core arguments are the senders and recipients (experiencers) of messages.

Other non-core arguments are usually rather predicate-specific.

## 1.4 Modifiers

Like non-core arguments, modifiers are assumed to evoke an additional frame, and labeled with the role they fill in that frame, but with a prefix marking them as modifiers: m-.

# 1.5 Nonverbal Predicates

So far, we have only looked at verbal predicates. But of course, there are other types of predicates. An ordinary noun like *tree* evokes the CLASS frame, mark-

ing the entity it refers to as being a member of a class (in this case: the class of trees). There are no arguments here because the predicate itself doubles as a referent. However, the predicate can of course be modified:

(36) a tree<sub>CLASS</sub> in the garden

Event nouns evoke event frames and have arguments:

Relational nouns evoke relational frames and have arguments:

Pronouns and names evoke the IDENTIFICATION frame, meaning that they identify their referent as some entity (via naming or anaphora resolution).

- (40) Kim<sub>IDENTIFICATION</sub>
- (41) they<sub>IDENTIFICATION</sub>

Predicate adjectives most typically denote states or qualities.

With attributive adjectives, the dependency relation is reversed, and the role label is changed accordingly.

 $\sqrt{\text{m-state}}$ (45) the tired dog<sub>CLASS</sub>

Similarly for adverbs denoting, e.g, manner (quality) or extent (quantity):

$$\begin{array}{ccc} & & \underbrace{\begin{array}{ccc} \text{(has-location)} \text{(m-quality)} \\ \hline \downarrow & & \\ \end{array}}_{\text{(46)}} & \text{Kim ran}_{\text{Motion}} & \text{fast} \end{array}$$

$$\begin{array}{c|c} & \underbrace{\begin{array}{c} \text{(has-location)} \text{m-quantity} \\ \hline \downarrow & \bigvee & \bigvee \\ \end{array}}_{\text{(47)}} & Kim \ ran_{Motion} \ far \end{array}$$

#### 1.6 Control Relations

spell out strategies for consistent detection (xcomp, MESSAGE/SCENE frames, special cases...)

Many constructions systematically introduce semantic predicate-dependent dependencies that do not correspond to (surface) syntactic dependencies. In such cases, we add those dependency links.

Kim seemed to fly<sub>Motion</sub> (raising) (50)

(51)Kim entered the room singing<sub>MESSAGE</sub> (depictive)

(52)You're talking me silly<sub>STATE</sub> (resultative)

(53)Kim has come to stay<sub>LOCATION-CONTINUATION</sub> (subjectless adverbial clause)

the song I like<sub>MESSAGE</sub> (relative clause) (56)

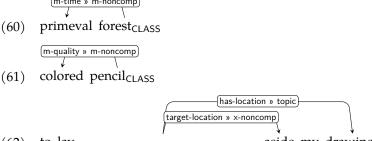

the question we raised without answering MESSAGE (parasitic gap) (57)

#### 1.7 Figurativity and Idiomaticity

Difficulties in choosing frames often arise because a predicate literally evokes one frame, but is used in a way that perhaps fits another frame equally well or better. In such cases, annotate both the more literal frame and roles, followed by the >> operator, followed by the more figurative frame and roles.

This mechanism can be used to indicate that a modification may not be fully compositional:

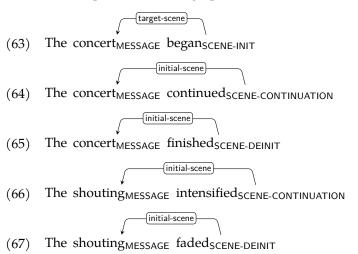

(62) to laylocation-change » message-deinit aside my drawings

## 2 Superframes Reference

## 2.1 SCENE

A "meta" frame for predicates where the main frame is invoked by scene, and the predicate adds some temporal, aspectual, modal, etc., meaning, or just acts as a light verb. If there is a participant, it is assigned a role by scene. In the following examples, we show the annotations for both the matrix predicate and the embedded predicate in one graph.

(68) A coupexperience was attempted<sub>SCENE-INIT</sub>

(69) Kim finished<sub>SCENE-DEINIT</sub> their work<sub>ACTIVITY</sub>

(70) Swift action prevented SCENE-INIT-NEG an outbreak SCENE-INIT of measles EXPERIENCE

(71) Kim refrained<sub>SCENE-INIT-NEG</sub> from going<sub>LOCATION-CHANGE</sub>

(72) Kim prevented<sub>SCENE-INIT-NEG</sub> Sandy from going<sub>LOCATION-CHANGE</sub>

(73) Kim saved<sub>SCENE-INIT-NEG</sub> Sandy from the dragon<sub>CLASS</sub>

(74) Kim plays<sub>SCENE</sub> tennis<sub>ACTIVITY</sub>

(75) Kim used<sub>SCENE</sub> to play<sub>SCENE</sub> tennis<sub>ACTIVITY</sub>

(76) Kim gave<sub>SCENE</sub> Sandy a kick<sub>HITTING</sub>

The modifier relation m-scene is used when a syntactic dependeny points from an argument to a predicate, as, e.g., with relative clauses or evaluatives.

(77) the clown<sub>CLASS</sub> I saw<sub>MESSAGE</sub> smiled

(78) Fortunately EXPERIENCE for Sandy , Kim is here LOCATION

rethink evaluatives

#### 2.2 IDENTIFICATION

identifier identifies identified.

Evoked by pronouns, names, and other identifiers, as well as predicates denoting naming relationships.

- (79) I<sub>IDENTIFICATION</sub> saw a picture
- (80) I can distinguish China<sub>IDENTIFICATION</sub> from Arizona

(81) a book called IDENTIFICATION True Stories from Nature

(82) This is Kim<sub>IDENTIFICATION</sub>

Predicates that evoke other frames can still use x-identified to mark the copula subject as identified:

## **2.3 RANK**

rank indicates the order that has-rank has in some sequence.

#### 2.4 CLASS

class indicates the class of entity that has-class represents.

Most prototypically evoked by common nouns with no arguments.

(86) swallowing an animal<sub>CLASS</sub>

#### 2.5 EXISTENCE

exists exists. Use this only for non-scene entities; for scenes, use the SCENE frame.

(88)There is<sub>EXISTENCE</sub> a hill

(89)There is<sub>SCENE</sub> a hubbub

#### 2.6 TRANSFORMATION-CREATION

Special case of EXISTENCE-INIT where rlcreated (aka target-exists) is newly created from material, or material is transformed to become created.

(91)Kim  $built_{Transformation-Creation}$  a castle out of sand

(92)Kim turned<sub>Transformation-Creation</sub> straw into gold

#### 2.7 REPRODUCTION

Special case of EXISTENCE-INIT where original continues to exist, and a (modified) copy (aka target-exists) comes into existence.

This is a translation<sub>Reproduction</sub> of the pamphlet into English (94)

#### 2.8 **QUALITY**

quality indicates a (permanent) quality/property/manner of has-quality.

(m-quality) (96)a magnificent picture<sub>MESSAGE</sub>

(97) I pondered<sub>MESSAGE</sub> deeply over the adventures of the jungle

### **2.9 STATE**

state indicates a (temporary) state of has-state.

(98) Boa constrictors swallow their prey whole<sub>STATE</sub>

(98) Boa constrictors swallow their prey whole<sub>STATE</sub>

(99) they sleep<sub>STATE</sub>

(100) they swallow their prey whole without chewings are supposed.

(100) they swallow their prey whole without chewing STATE-CHANGE it

01) the six months that they need for digestions TATE CHAN

(101) the six months that they need for  $digestion_{STATE-CHANGE}$ 

(102) And that hasn't much improved<sub>STATE-CHANGE</sub> my opinion of them

#### 2.10 DESTRUCTION

Special case of STATE-CHANGE where destroyed (aka has-state) goes out of existence.

(103) Sam 's death<sub>Destruction</sub>

x-causer -

(104) Sam 's destruction<sub>Destruction</sub> of the city

#### 2.11 EXPERIENCE

experienced indicates an experience that experiencer undergoes.

Used for dynamic scenes where the experiencer is not necessarily active, and that cannot well be framed as a state change. Also used for sensory and mental perception, addressees in communication, beneficiaries, and for "bystander" roles.

(105) Kim 's adventures<sub>EXPERIENCE</sub> in the jungle

x-causer experiencer

(106) Kim attacked<sub>EXPERIENCE</sub> Sandy

(107) I saw<sub>MESSAGE</sub> a magnificent picture

(108) I pondered<sub>MESSAGE</sub> deeply

Kim talked<sub>MESSAGE</sub> to Sandy (109)

(110) Kim did<sub>SCENE</sub> something nice for Sandy

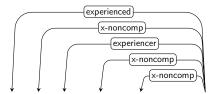

(111)

Kim managed<sub>EXPERIENCE</sub> with dealing the cards (112)

(113) Die Piroggen waren Maria zu dunkel geraten<sub>SCENE-INIT</sub>

(114) Das hat mir gerade noch gefehlt<sub>EXPERIENCE</sub>

For more uses, see MESSAGE (Section 2.29).

## 2.12 ACTIVITY

is-active actively participates in activity.

Used for dynamic scenes where is-active has agency and that cannot well be framed as a state change.

(117) Kim had sex<sub>ACTIVITY</sub>

(118) after some work<sub>ACTIVITY</sub> with a colored pencil

#### 2.13 **MODE**

Used for adverbial modifiers that have no arguments other than the phrase they modify, and that, roungly speaking, indicate the modal strength of what is expressed and/or its relation to the discourse.

(120) Even Kim<sub>IDENTIFICATION</sub> did n't know that

(121) They only rinsed<sub>ADORNMENT-TARNISHMENT-DEINIT</sub> the dishes

(122) Passt<sub>COMPARISON</sub> das eh ?

(123) Kim probably knows<sub>MESSAGE</sub> that

(124) That 's really great<sub>QUALITY</sub>

(125) Kim is not hereLOCATION

### 2.14 ACCOMPANIMENT

accompanier accompanies accompanied, meaning that it occurs together with it or participates equally in the same scene.

(126) veggies<sub>CLASS</sub> with rice

(127) The veggies come<sub>ACCOMPANIMENT</sub> with rice

(129)Rolling thunder accompanies ACCOMPANIMENT the rain

Often, the accompanier denotes not the accompanying scene but an entity participating in it, and must be metonymically understood as the scene.

Kim  $cycled_{LOCATION-CHANGE}$  to Rome with Sandy (130)

(132)Kim had<sub>SCENE</sub> sex with Sandy

Kim  $chased_{Motion}$  Sandy around the block (133)

Kim  $accompanied_{ACCOMPANIMENT}$  Sandy on the piano (135)

#### **DEPICTIVE** 2.15

Special case of ACCOMPANIMENT where depictive (aka accompanier) assigns a participant of has-depictive (aka accompanied) a role (cf. Sec. 1.6).

Kim entered<sub>LOCATION-INIT</sub> the room  $singing_{MESSAGE}$ (136)

#### **ATTRIBUTE** 2.16

In a scene has-attribute, attribute is the part or attribute of one or more participants that is most directly involved in the scene.

(137) Kim exceeds<sub>COMPARISON</sub> Sandy in height<sub>QUALITY</sub>

(138) That is  $great_{QUALITY}$  in terms of  $ROI_{QUALITY}$ 

(139) Kim ist auf den Kopf<sub>CLASS</sub> gefallen<sub>HITTING</sub>

(140) Kim hit<sub>HITTING</sub> Sandy on the head<sub>CLASS</sub> with a stick

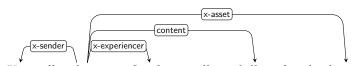

Control relations?

#### **2.17 ASSET**

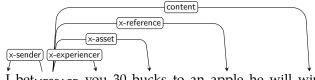

In a scene has-asset, asset is given or offered in an exchange or wager.

(141) Kim bought<sub>POSSESSION-CHANGE</sub> the house for a million dollars

(142) Kim offered  $_{\mbox{\scriptsize MESSAGE}}$  Sandy a million dollars for the house

(143) I  $bet_{MESSAGE}$  you 30 bucks to an apple he will win

#### 2.18 COMPARISON

compared is characterized with respect to reference. Examples of comparing scenes:

(145) Sandy is shortQUALITY whereas Kim is tall

(146) They demonize MESSAGE the left while doing nothing about the right

Examples of comparing non-scene entities:

(147)Kim outranks<sub>COMPARISON</sub> Sandy

(148) Kim exceeds<sub>COMPARISON</sub> Sandy in height

The Polish restaurant compared<sub>COMPARISON</sub> favorably to the Spanish one (149)

(150) Kim compared<sub>COMPARISON</sub> Coke to Pepsi

Kim ran<sub>COMPARISON</sub> afoul of Fielding 's constraints

#### 2.19 **CONCESSION**

Special case of COMPARISON, where compared is what's asserted and reference is what's conceded.

(152) Kim went<sub>LOCATION-CHANGE</sub> out despite the rain

(153)It rained<sub>STATE</sub>, but Kim went went out

Kim sent<sub>SENDING</sub> Sandy a letter but it never arrived (154)

Kim came<sub>LOCATION-CHANGE</sub> although Sandy had told them not to (155)

#### **EXPLANATION**

explanation explains explained, but is not a cause, but, e.g., a purpose.

(156)I am stressing<sub>MESSAGE</sub> this because it is important

Kim went<sub>LOCATION-CHANGE</sub> to town to buy<sub>POSSESSION-CHANGE</sub> food

#### 2.21 LOCATION

Describes has-location as located or moving wrt. respect to location.

-(m-location)-

the  $hat_{CLASS}$  in the box (158)

(159) Kim lives<sub>LOCATION</sub> in Boston

Kim went<sub>LOCATION-CHANGE</sub> from the living room through the door into the kitchen (160)

(161) Kim placed<sub>LOCATION-CHANGE</sub> the hat on the table

#### WRAPPING-WEARING 2.22

Special case of LOCATION where wearer (aka location) wears or is wrapped in wrapper (aka has-location).

(162)Kim is wearing WRAPPING-WEARING a shirt

(163)Kim is wearing WRAPPING-WEARING glasses

(164)The shroud wraps<sub>WRAPPING-WEARING</sub> the scepter

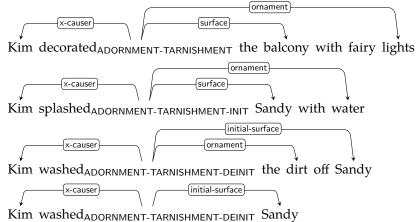

Kim putwrapping-wearing-inti on a sweater (165)

wrapper Kim took<sub>WRAPPING-WEARING-DEINIT</sub> off their glasses (166)

## **ADORNMENT-TARNISHMENT**

Special case of LOCATION where ornament (aka has-location sits on surface (aka location).

#### 2.24 HITTING

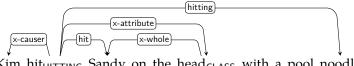

Special case of LOCATION-INIT where hitting (aka has-location) comes into contact with hit (aka target-location).

(168)Kim hit<sub>HITTING</sub> Sandy with a stick

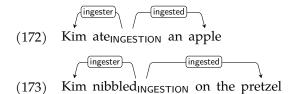

(169)

(170)Kim hitHITTING Sandy on the headCLASS with a pool noodle

#### 2.25 **INGESTION**

Special case of LOCATION-INIT where ingester (aka target-location) ingests ingested (aka has-location).

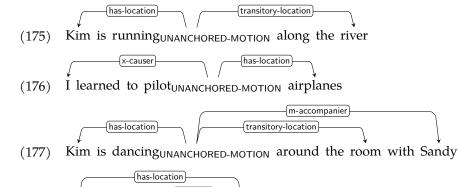

#### 2.26 EXCRETION

Special case of LOCATION-DEINIT where excreter (aka initial-location) excretes excreted (aka has-location).

#### 2.27 UNANCHORED-MOTION

Special case of LOCATION-CHANGE where no initial or target location is indicated.

(178) Kim is an avid unicyclist<sub>UNANCHORED-MOTION</sub>

define clearly when dancing etc. is UNANCHORED-MOTION and when it is ACTIVITY

#### **2.28 MEANS**

has-means is a scene caused by something via an intermediary means.

(180) Kim painted<sub>ADORNMENT-TARNISHMENT</sub> the room by exploding a paint bomb

Kim used $_{\mathsf{MEANS}}$  a pen to  $\mathsf{get}_{\mathsf{LOCATION-DEINIT}}$  the lid off (181)

You used<sub>MEANS</sub> me! (182)

#### 2.29 **MESSAGE**

A message about topic with content content is expressed or received or just exists in recorded form. When content and topic are both realized, content must assign a role to topic.

#### 2.29.1 Expression

(183) Kim yelped<sub>MESSAGE</sub>

Kim said<sub>MESSAGE</sub>: it 's fine

(185)Kim said<sub>MESSAGE</sub> it was fine

Kim called<sub>MESSAGE</sub> Sandy a liar<sub>MESSAGE</sub> (186)

(187) Kim told<sub>MESSAGE</sub> Sandy a secret

Kim talked<sub>MESSAGE</sub> about Sandy (188)

(189)Kim talked<sub>MESSAGE</sub> shit<sub>MESSAGE</sub> about Sandy

(190) Kim and Sandy conversed<sub>MESSAGE</sub>

(191) Kim conversed<sub>MESSAGE</sub> with Sandy

#### **2.29.2** Gesture

Kim curtseyed $_{\mathsf{MESSAGE}}$  to the Queen (192)

x-content » content

(193) Kim shook<sub>UNANCHORED-MOTION</sub> » MESSAGE their head no

#### 2.29.3 Performance

Performance of a work of art is framed as MESSAGE where the work of art is the topic.

(194) Kim played<sub>MESSAGE</sub> a little tune on their tuba

(195) They performed<sub>MESSAGE</sub> the play

(196) Kim sang<sub>MESSAGE</sub> a song

#### 2.29.4 Depiction

(197) Kim drew<sub>MESSAGE</sub> a heron

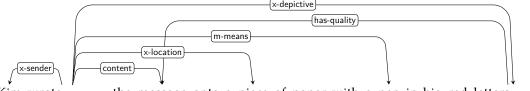

a picture MESSAGE of the heron (198)

## 2.29.5 Recording

(199)Kim drew<sub>MESSAGE</sub> a picture

(200) Kim wrote<sub>MESSAGE</sub> Sandy a letter

(201) Kim wrote<sub>MESSAGE</sub> the message onto a piece of paper with a pen in big red letters<sub>QUALITY</sub>

- (202) The concert was  $recorded_{MESSAGE}$  on tape
  - x-sender x-created x-created
- (203) The band recorded<sub>MESSAGE</sub> an album

#### 2.29.6 Perception

We also frame perception as MESSAGE, including mental and volitional perception.

- x-experiencer topic topic
- (204) Kim saw<sub>MESSAGE</sub> a flower

- (205) Kim found<sub>MESSAGE</sub> the flower beautiful<sub>QUALITY</sub>
  - x-experiencer content
- (206) Kim thinks<sub>MESSAGE</sub> Sandy is a liar

(207) Kim thinks<sub>MESSAGE</sub> Sandy a liar<sub>MESSAGE</sub>

(208) Kim saw<sub>MESSAGE</sub> Sandy swim<sub>UNANCHORED-MOTION</sub>

(209) Kim wants<sub>MESSAGE</sub> to swim<sub>UNANCHORED-MOTION</sub>

(210) Kim wants<sub>MESSAGE</sub> Sandy to swim<sub>UNANCHORED-MOTION</sub>

(211) Kim seems<sub>MESSAGE</sub> happy<sub>MESSAGE</sub>

(212) Kim seems<sub>MESSAGE</sub> happy<sub>MESSAGE</sub> to Sandy

(213) The Thought Police observed<sub>MESSAGE</sub> Winston

(214) Kim studies<sub>MESSAGE</sub> linguistics

(215) Sandy is a professor<sub>MESSAGE</sub> of linguistics

(216) The jury found<sub>MESSAGE</sub> Kim guilty<sub>SCENE</sub> of the crime<sub>ACTIVITY</sub>

Use MESSAGE-INIT (MESSAGE-DEINIT, MESSAGE-INIT-NEG) for the coming about (ending, failing to come about) of knowledge and awareness.

(218) Kim taught<sub>MESSAGE-INIT</sub> Sandy Spanish

(219) Kim measured MESSAGE-INIT the elasticity

(220) Kim forgot<sub>MESSAGE-DEINIT</sub> everything they knew

(221) Kim forgot<sub>MESSAGE</sub> about the cake

(222) Kim  $forgot_{MESSAGE-INIT-NEG}$  to take the trash out

#### 2.30 PART-WHOLE

part is part of whole.

(224) a man<sub>CLASS</sub> with a mustache

(225) part<sub>PART-WHOLE</sub> of the year

## 2.31 POSSESSION

possessor possesses or controls the possessed.

(228) Kim ownspossession a house

(229) The house belongs POSSESSION to Kim

(230) the owner<sub>POSSESSION</sub> of the house

(231) Kim has<sub>POSSESSION</sub> Sandy 's phone

(232) Kim bought<sub>POSSESSION-CHANGE</sub> a house from Sandy

(233) Sandy sold<sub>POSSESSION-CHANGE</sub> Kim the house

(234) Kim kept<sub>POSSESSION-CONTINUATION</sub> the house

(235) Kim lost<sub>POSSESSION-DEINIT</sub> the house

(236) Caesar conquered<sub>POSSESSION-INIT</sub> Gaul

(237) Caesar 's conquest<sub>POSSESSION-INIT</sub> of Gaul

(238) Kim owespossession-change-necessity Sandy money

## 2.32 QUANTITY

quantity is the quantity, degree, or extent of has-quantity.

(240)three litersquantity of coke

We discourage MESSAGE this emphatically (241)

#### 2.33 **SENDING**

sender originates a message, sent, that can be experienced.

(242) According to Kim it is raining<sub>STATE</sub>

For more uses, see MESSAGE (Section 2.29).

#### 2.34 **SEQUENCE**

follows follows followed, e.g., temporally, logically, by rank, as heir, etc.

(243) Form follows<sub>SEQUENCE</sub> function

Cook is Jobs 's successor<sub>SEQUENCE</sub>

(245)Das fußt<sub>SEQUENCE</sub> auf einer falschen Vorstellung

Kim deduced<sub>SEQUENCE</sub> the truth from the clues (246)

(247) Given that I 'm tired , I wo n't be there LOCATION

#### 2.35 CAUSATION

Special case of SEQUENCE where causer (aka followed) causes result (aka follows).

x-causer has-state

(248) Kim broke<sub>STATE-CHANGE</sub> the glass

x-causer has-state

(249) The knife cut<sub>STATE-CHANGE</sub> the bread

x-causer has-state has-state

(250) Kim cut<sub>STATE-CHANGE</sub> the bread with a knife

causer

(251) The war caused<sub>CAUSATION</sub> a famine

x-expletive scene (m-causer)

(252) There was<sub>SCENE</sub> a famine because of the war

(m-result)

(253) Der Wasserdruck stiegquantity-change, wodurch der Brunnen überfloss

(254) Die Qualität ist der Motivation geschuldet<sub>CAUSATION</sub>

(255) Kim went<sub>LOCATION-CHANGE</sub> to town because they wanted to buy food

Note how the last example expresses a purpose, but expresses it as a cause, so m-causer lis the right label to use. Compare this to construal as a purpose:

(has-location) (target-location) (target-location) (target-location)

(256) Kim went<sub>LOCATION-CHANGE</sub> to town to buy food

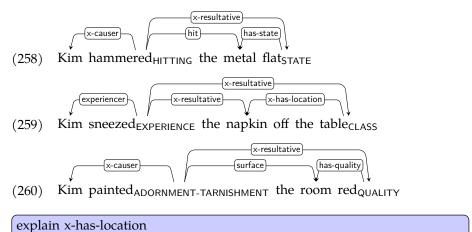

## 2.36 REACTION

Special case of CAUSATION where trigger (aka causer) triggers a reaction (aka result) in the x-causer.

(257) Kim reacted<sub>SEQUENCE</sub> to the allegations with a denial

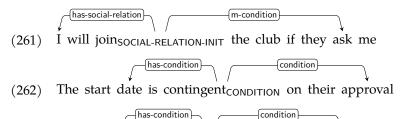

#### 2.37 **RESULTATIVE**

Special case of CAUSATION where resultative (aka result) assigns an argument of has-resultative (aka causer) a role. We treat the English resultative construction as a valency-changing operation that adds one or two arguments to the matrix predicate, so we use x-resultative rather than m-resultative.

#### 2.38 CONDITION

Special case of SEQUENCE where condition (aka followed) is a condition to hascondition (aka follows).

Eine Aussöhung bedingtsequence eine Entschuldigung (263)

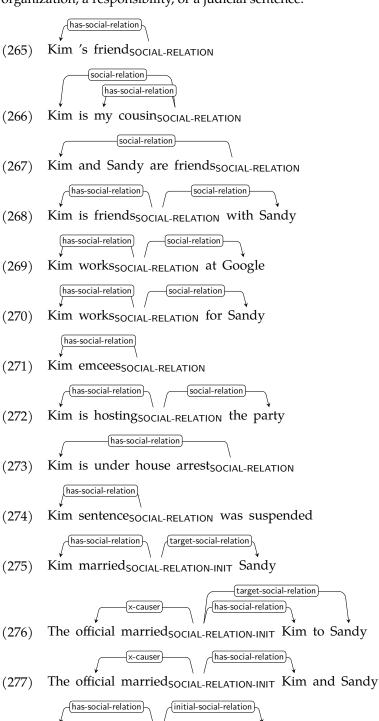

#### 2.39 **EXCEPTION**

Special case of SEQUENCE where exception (aka followed) is an exception (a negative condition, if you will) to has-exception (aka follows).

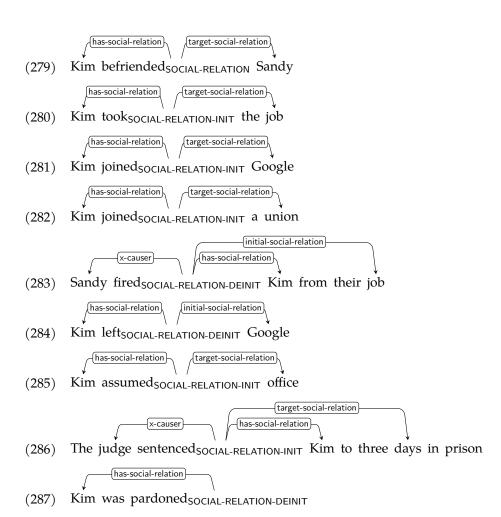

#### 2.40 **SOCIAL-RELATION**

has-social-relation is an individual that is in some socially constructed relationship with social-relation. social-relation might, e.g., be a relative, a friend, an organization, a responsibility, or a judicial sentence.

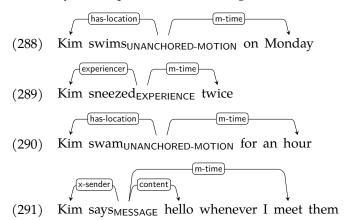

Kim divorced<sub>SOCIAL-RELATION-INIT</sub> Sandy

(278)

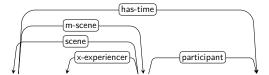

#### 2.41 TIME

time indicates when, how often, or for how long has-time takes place. Also evoked by time expressions without arguments.

(292) Once<sub>TIME</sub> when I was six years old

(293) the six months<sub>TIME</sub> they need<sub>SCENE-NECESSITY</sub> for digestion

#### 2.42 NONCOMP

Used to mark syntactic arguments that are thought of as part of the predicate, as in verbal idioms, weather verbs, inherently reflexive verbs, or existential *there*.

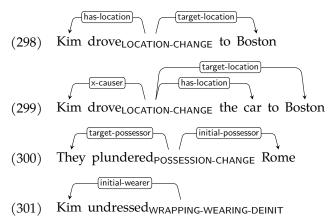

(297) There was<sub>SCENE</sub> a famine

Light verbs, on the other hand, are treated with SCENE, see Section 2.1.

## 3 Memos

## 3.1 Prefer Core over Non-core Arguments

When an argument fills both a core and a non-core role, it is more important to annotate the former.

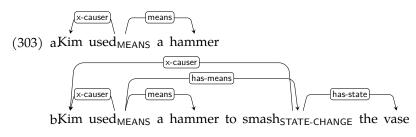

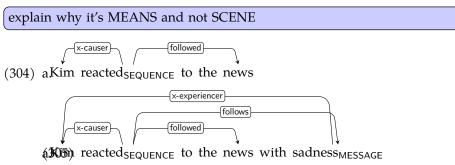

## 3.2 Arguments Determine Frames

The most important criterion in choosing a frame for a predicate is that there should be suitable roles for the predicate's arguments, even if they are unrealized in the annotated instance. For example, while *drawing* denotes a CLASS of things, it can occur with a prepositional argument denoting a topic, so MESSAGE is a better choice.

# 3.3 Implicit, Shadow, Default Arguments Determine Frames, Too

Implicit arguments or unrealized arguments are arguments that are part of the syntactic frame of the predicate but are not realized in the present instance. For example, the superframe chosen in ??, ??, and ?? may not be obvious unless you consider the implicit argument, which are made explicit in ??, ??, and ??.

# 3.4 When in Doubt, Treat Different Syntactic Frames of the Same Predicate Consistently

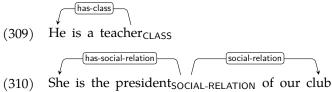

For example, in ??, chase could be framed as caused motion with Kim as x-causer or as accompanied motion with Kim as x-accompanier. Because the latter works for other syntactic frames of chase as well, as in ??, prefer it.

## 3.5 Participant Nouns

Some nouns denote a person who participates in a specific type of scene in a specific type of role. In such cases, use the most appropriate frame for that scene. For example, in a narrative where the narrator has just been criticized by a stranger, you could annotate as follows:

In other cases, such nouns rather denote a person's profession or expertise or their role in a social context:

#### 3.6 Particle Verbs

In UD, particle verbs are connected to their particle via the compound:prt relation. If the meaning is spatial, this dependency is labeled with initial-location or target-location.

In semi-non-compositional particle verbs, where the particle adds a partially predictable but nonspatial meaning to the verb, use an appropriate role, e.g., x-marker if the meaning is aspectual.

In fully non-compositional particle verbs, where the meaning is not predictable, use x-noncomp.

(314) doexperience somebody in (does not imply do somebody)

refer to PARSEME guidelines
